

Summer Work for Students Entering Second Grade

Dear Second Grader,

I hope you have a fantastic summer. In order to help you do your best when you return for the new school year you need to review the skills you learned over the summer. The following work will be expected during the first day of school.

Math:

- Memorize the addition and subtraction facts from 0 to 20
- Practice counting coins
- Practice telling time on an analog clock (to the hour and half hour)
- Practice your Math skills by logging onto your Mathletics account and play the online games
- If you did not attend Holy Family last year, you do not have a Mathletics account yet. Your child can review the skills they learned last year online at another good website, <http://www.ixl.com/math/grade1> .

Reading:

- Read at least 10 books. Write the title and author of each book on loose-leaf.
- On loose-leaf write two book reports. Be sure to include your name, date, book title, and author, and at least four sentences about the book.
- Complete the Summer Fun Challenge using your Education City account.

Religion:

- Remember to practice your prayers and attend Mass every Sunday.

Have a wonderful, safe, and blessed summer.

Thank you!
